

Plan, Configure and Manage IBM® Power Systems

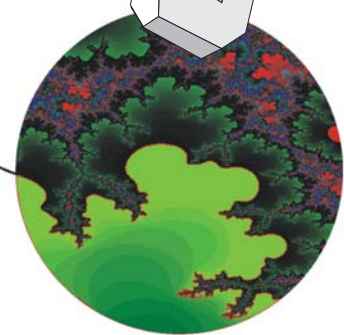

With

MPG's Navigator Family™

Single Interface

Performance Navigator®
for i5OS®

Power Navigator®
for AIX® and Linux®

Track the performance HISTORICALLY for all operating systems supported by IBM Power Systems. Even collect data from Solaris and HP-UX, and consolidate to an IBM Power System. Use on existing systems to scientifically plan your server consolidation and then manage the new Power System. Take advantage of what over 125 IBM business partners already know, that MPG's Navigator Family is **THE** preferred method of planning your next server upgrade or server consolidation and managing it on an on-going basis.

Download a FREE trial.

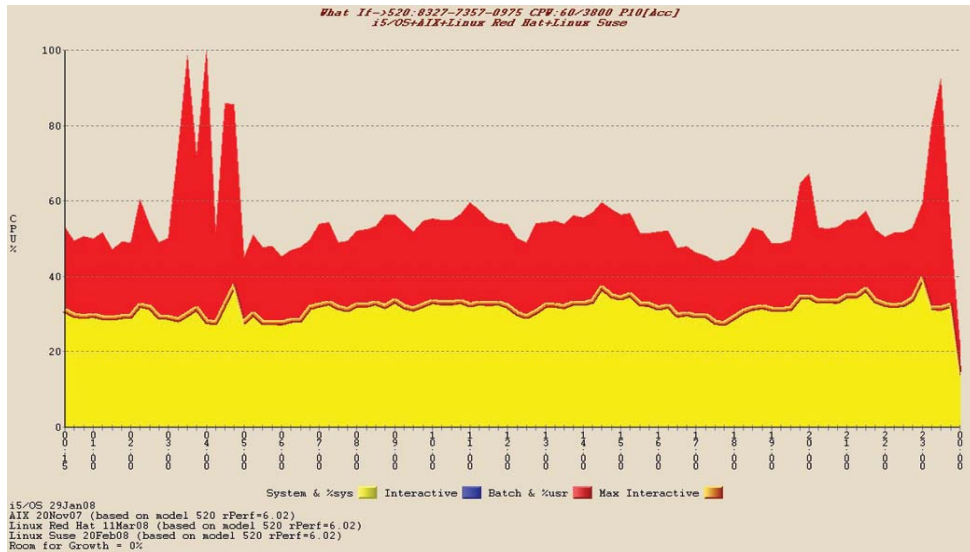

Gain access to performance workloads from these operating systems.
